ROADBLOCKS

0
G 60

Firefighter teams with barriers, sirens and megaphones keep people away from bridges, basements and low-lying areas when flooding is predicted.

IT WILL ALL BE FINE!

0
G 0

Ostrich tactic. Everything is denied, even the evidence. Damage is accepted with fatalism and it is said that what must happen, happens: we miserable humans could not have done better than this.

SCAPEGOAT

0
G 10

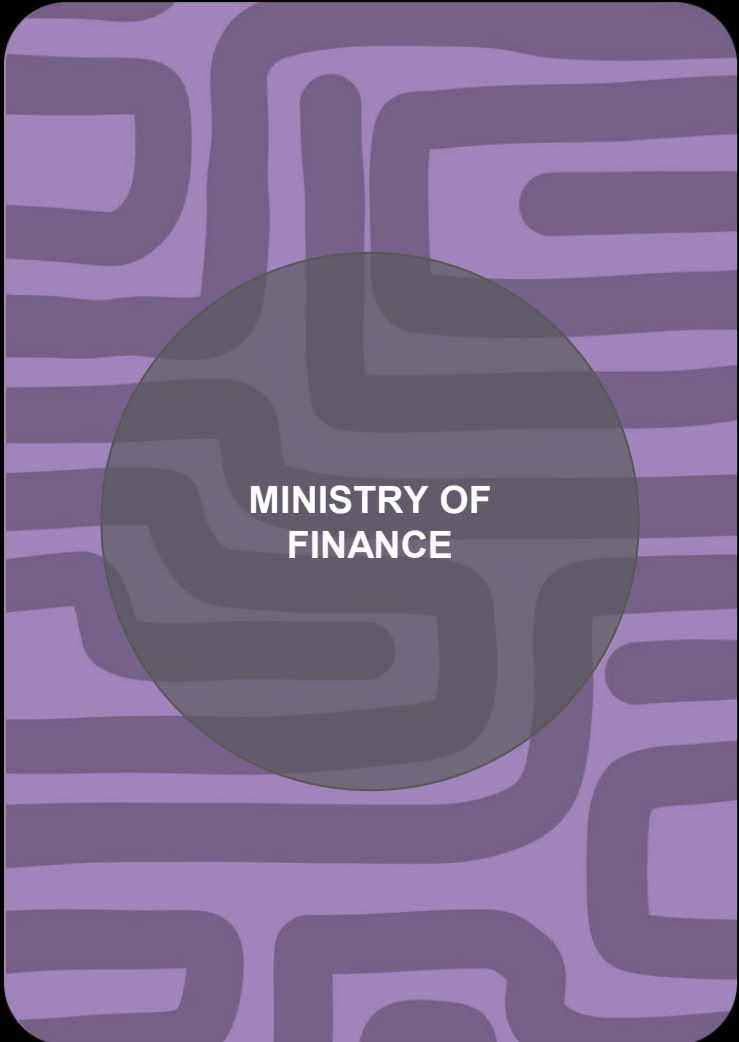

Every disaster is better accepted if a scapegoat is found. This explains the buck-passing between mayors, ministers, governors, etc. This time the fault for the flood lies with the coypu that dig their burrows inside the banks!

DAMAGE INSURANCE

0
G 0

Some citizens pay insurance companies so that they can be compensated for damages in the event of natural disasters. Since they pay for them out of their own pockets, the state coffers are not touched, but the population would have preferred to spend the money otherwise.

TRAINING WORKSHOP ON NATECH RISK

0
G 10

When a technological accident such as a fire is triggered by a natural hazard, it is called a NaTech event. It is a cascading effect. Knowing this in advance can make it possible to break the chain and thus also avoid these collateral damages.
